PLANT MAKES LABORATORY ELECTRICAL EQUIPMENT FOR UNIVERSITY;
THEATER ORDERS SPECIAL MOTORS

MAKES COILS, RAY TUBES FOR UNIVERSITY -- Leningradskaya Pravda, 18 Aug 50

The Leningrad Elektrodelo Plant has begun work on a large order from the Administration of Capital Construction of the Moscow State University imeni Lomonosov. Among the thousands of instruments and pieces of apparatus for laboratories and studies will be 15,000-90,000-volt Ruhmkorff coils, tempering, muffle and crucible furnaces, drying cabinets, thermostats, and tubes for study of cathode-ray diffusion.

The first shipment on the order will be on its way in the near future.

MAKES SPECIAL MOTORS FOR THEATERS -- Vechernyaya Moskva, 22 Aug 50

The Moscow Electrical-Machine Building Plant imeni Vladimir Il'ich has received an order from the Bol'shoy Theater for several high-power electric motors of special design.

Plant engineers have designed and built the first such motor. Tests have indicated that the motor will meet all the requirements specified by the purchaser. Two more of the new units will shortly be assembled for the Bol'shoi.

PUSH LEAD, COPPER, SILK CONSERVATION -- Leningradskaya Pravda, 18 Aug 50

The Moscow Cable Plant and the Sevkabel' Plant in Leningrad have been engaged in socialist competition. The competitive indexes include quality of product, amount of nonferrous metals, silk, and other materials saved. The lead-press brigade, which is doing particularly well, is saving 50-70 kilograms of lead daily. The winding shop is cutting down rejects and saving large quantities of copper, thread, and silk.

TELEPHONE EQUIPMENT FOR SALE -- Moscow, Trud, 18 Aug 50

The Moscow Office of Glavelektrosvyaz'sbyt (Main Administration for Sale of Electrical Communications Equipment) of the Ministry of Communications Equipment Industry has for sale the following items: ATS, TsB, and MB telephones; TsB and MB commutators, director and dispatcher types; and spare parts.

Shipment will be made from the office's warehouse in Moscow. -- Advertisement

REFUSES TO INSTALL NEW METERS -- Alma-Ata, Kazakhstanskaya Pravda, 18 Aug 50

The following is a letter to the editor: For 3 years the Moscow Plant of the Ministry of Electrical Industry has been making IT and TCh electric meters. But Korobeynikov, chief of the Alma-Ata Electric Meter Repair Shop, is not accepting these models for installation. To the many residents of Alma-Ata who have bought the new Soviet-made meters, he has this to say: "I have not been told that they can be used."

On four different occasions the Alma-Ata Heavy-Machine Building Plant has asked to have new-model meters installed in living quarters along Chaykovskiy, Stroitel'naya, and Dzhambul streets. Each time Korobeynikov has refused. He says you have to buy the old type meter.

Meanwhile, the new meters are working perfectly well in shops of industrial enterprises all over the city. It's time Korobeynikov recognized them. -- P. Shamin, chief of the Power Laboratory, Alma-Ata Heavy-Machine Building Plant.

TIGHT CONTROL CUTS REJECTS TO 0.25 PERCENT -- Vil'nyus, Sovetskaya Litva, 18 Aug 50

Methods of technical inspection are being modernized at the Vil'nyus El'fa Plant. Inspectors from the OTK (Department of Technical Inspection) are currently engaged in a drive to eliminate rejects in the machine shop where parts for the Litva Motor are machined. Inspectors make the rounds of the lathes, checking on the quality of the product. Wherever an inspector notices the slightest violation of the prescribed technological process, he calls the attention of the administration to it. No further machining is done until the trouble has been corrected.

As a result, rejects are down to a minimum. At present, the reject rate in the machine shop is down to 0.25 percent. For 7 months of 1950 not a single complaint against a Litva motor has been received.

Vil'nyus, Sovetskaya Litva, 11 Aug 50

The Vil'nyus El'fa Plant has undertaken manufacture of electrical equipment for gas refrigerators.

PRODUCES 100 TYPES OF CABLE -- Yerevan, Kommunist, 10 Aug 50

The Yerevan Cable Plant of the Ministry of Electrical Industry produces 100 different types of cable. Six or 7 of these went into mass production during the first 6 months of 1950. The new varieties are for use in construction wiring.
